

About City of Mill Creek Youth Advisory Board?

The Mill Creek Youth Advisory Board is a group of students living in the Mill Creek area committed to making a difference in their community. It is made up of Junior High and High School Students of all different backgrounds, that have come together to be a part of the Youth Advisory Board, an organization committed to making a difference in the community.

The Mill Creek Youth Advisory Board is going on its eighth year. Members have been selected to represent their peers and the City of Mill Creek. During their time as board members, these students will be creating new programs for teens, organize special activities and plan community service opportunities.

In the past, the Mill Creek Youth Advisory Board has done a lot in the community. They've helped out during the Summer Concert Series, the Tree lighting, Easter Egg Eggstravaganza and the Mill Creek festival, painting sewer drains with the Public Works Department, and Adopt a Stream. The Youth Advisory Board has also planned and implemented their own activities like a Video game tournament, Dodge ball tournament, Parents night out. The board likes to help fundraising for the Special Olympics, and was involved in Octoberfest, at Jackson High School. The Youth Advisory Board was also a strong supporter of the skate park at Mill Creek Sports Park. The impact of the Youth Advisory Board is clear, and it is because of the team of youth that are dedicated to their community.

Every Spring the Mill Creek Youth Advisory Board selects new members to fill vacated positions to begin the following school year. All students that are interested in getting involved with their community are encouraged to apply.

Commitment, reliability, enthusiasm, desire to serve their community and leadership skills are attributes we seek when selecting new Mill Creek Youth Advisory Board members.

If you have any questions or are interested in applying to the Mill Creek Youth Advisory Board, please contact Brian Davern at (425) 921 – 5736.
