Mill Creek, WA 989012

*This corrected letter supersedes the previous one for this project dated October 2, 2019*

Dear Ms. Ringstad:

Reference No.: Crestview Village Phase II

District DR Number: 19-190

The District presently has enough electric system capacity to serve the proposed development. However, the existing District facilities in the local area may require upgrading. The developer is required to supply the District with suitable locations/easements on all parcels where electrical facilities must be installed to serve the proposed development. It is unlikely that easements will be granted on District-owned property, or consents granted within District transmission line corridors. Existing PUD facilities may need modifications or relocations at the developer's expense. Any relocation, alteration or removal of District facilities to accommodate this project shall be at the expense of the project developer and must be coordinated with the PUD in advance of final design. Please include any utility work in land-use and all other applicable permits.

Cost of any work, new or to upgrade, existing facilities that are required to connect this proposed development to the District electric system shall be in accordance with the applicable District policies. The District policy requires the developer to provide a 10-foot easement and an 8-foot clearance between any building/structures and transformers/switch cabinets upon its property for underground electrical facilities that must be installed to serve the proposed development.

Please contact the District prior to design of the proposed project. For information about specific electric service requirements, please call the District's Plat Development Team at (425)783-4350.

Sincerely,

A handwritten signature in blue ink that reads "Jason Zyskowski".

Jason Zyskowski, Senior Manager  
Transmission & Distribution System  
Operations & Engineering
